

SCOSTEP/ISWI International School on Space Science
November 7-10, 2016
Sangli, Maharashtra, India

The SCOSTEP/ISWI International School on Space Science will be held at the Smt. Kasturbai Walchand College of Science & Arts, Sangli-416416, India during November 7 to 17, 2016. The school will be an excellent learning and enrichment opportunity for graduate students. The school is aimed at students who are perusing PhD in solar terrestrial physics and space science. Some masters students who have already some exposures in solar/space physics may also apply. Some financial assistance will be provided to students and scientists attending the school. Indian students will be reimbursed with train fare from their home institution. Total number of students to be selected 40 (from India) + 20 international. All selected students will be provided with local hospitality. The School is primarily sponsored by the Scientific Committee on Solar-Terrestrial Physics (SCOSTEP) and the International Space Weather Initiative (ISWI). There are also co-sponsors from many institutions in India and Japan.

Further details on the School schedule and on-line application are available at http://www.iiap.res.in/meet/school_meet/index.php
