Dear ISWI Participant:

I attach an excellent photo report from the organizers of a space weather event that recently took place in Nigeria.

On slide 3 you can see that Prof. Rabiou has announced the formation of CAR -- Centre for Atmospheric Research. It is part of Nigeria's space agency (National Space Research and Development Agency, under the Federal Ministry of Science & Technology). The first director of CAR is, of course, Prof. Rabiou. CAR is located on the campus of Kogi State University in Anyigba, Nigeria.

I would like to take this opportunity to congratulate Prof. Rabiou for successfully establishing this new center in his homeland Nigeria. I expect this center will achieve great things in the coming years and decades; I expect to mention these achievements in the issues of this newsletter. Prof. Rabiou: "Well done!".
